PHOTOREFRACTIVE COMPOSITION

Abstract of the Disclosure

A composition comprising a polymer represented by the following formula (i),

5 wherein the composition exhibits photorefractive ability:

$$\left(\begin{array}{c} R \\ S \\ Z \end{array}\right)$$
 o formula (i)

wherein R is selected from the group consisting of a linear alkyl group with up to 10 carbons, a branched alkyl group with up to 10 carbons, and an aromatic group with up to 10 carbons; n is an integer of 10 to 10,000; Z is a group which contains at least a tri-aromatic amine moiety shown in the structure (ii):

wherein Ra₁-Ra₁₄ are independently selected from the group consisting of a hydrogen atom, a linear alkyl group with up to 10 carbons, a branched alkyl group with up to 10 carbons, and an aromatic group with up to 10 carbons.
